### Description

### Position Summary

A dynamic online customer service agency is hiring remote Live Chat Assistants to help manage and support user inquiries through live messaging platforms. This entry-level opportunity is ideal for job seekers looking for legitimate remote work that requires no college degree and no prior experience. Whether you're just getting started in your career or returning to the workforce, this fully remote role offers flexibility, structured onboarding, and competitive pay—all from the comfort of your own home. As a Live Chat Assistant, your main task will be communicating with customers in real-time via the company's web chat platform. Your role is to answer questions, provide accurate information about services or products, and assist with simple troubleshooting. You'll never have to be on the phone—everything is handled through written text. With user-friendly tools, customizable scripts, and a supportive training team, you'll be ready to start working quickly, regardless of your background.

### What You'll Be Doing

#### Responding to Customer Chat Inquiries

You'll engage with customers through the company's web-based chat system, offering real-time answers to questions about products, orders, or account details. These conversations will be short, structured, and text-based only.

#### Utilizing Pre-Written Responses

The platform includes hundreds of template responses and AI-powered suggestions, allowing you to respond confidently without needing to write each message from scratch. This helps reduce stress and ensures faster communication with customers.

#### Identifying and Escalating Complex Issues

If a customer presents a request or issue that goes beyond your training—such as refunds, technical failures, or personal data errors—you'll use a simple one-click escalation feature to forward the conversation to a supervisor or Tier 2 support rep.

## A Day in the Life

Your workday begins when you log into the live chat dashboard. Customers are automatically routed to your queue, and you begin handling one or more chats depending on your comfort level. You'll respond to simple inquiries using prewritten answers, escalate only when necessary, and wrap up each session with a short summary. The platform is browser-based, and all communication is written. You won't attend video meetings or take phone calls.
